**Restriction/Election**

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I. Claims 1-36, drawn to a process for making eyeglass, classified in Class 264, subclass 239.

Group II. Claims 37-73, drawn to an eyeglass frame, classified in Class 351, subclass 41.

The inventions are distinct, each from the other because of the following reasons:

Each of the invention I and II, recites limitations not recited in any of the other invention. The differing limitations make the inventions I and II patentably distinct from one another, i.e. a reference that anticipates or makes obvious one of the inventions I and II would not, by itself, anticipate or make obvious any of the remaining invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Art Unit: 2873
